## Electrolux Macedonia-Palenzo

### Advantages of our hotel security products

Electrolux Macedonia provide hotel security solutions that are tailor-designed by our dedicated team to meet our customers' needs. If you are looking for quality, reliability, style and a lifetime of support for your product, we could be the answer.

### Advantages of our hotel security products

Our customers often wonder how we are able to deliver high quality hotel security products at such a reasonable price. The answer comes from Electrolux Macedonia's distinct approach to its products. Rather than being a simple 'buy-sell' process, Electrolux Macedonia builds a relationship with its customers based on mutual investment.

**Electrolux Palenzo provides all types and sizes of safes.**

We invest our customers' money in the following:

- High quality components
- Durable and reliable systems
- Professional integration
- Professional installation
- Professional training
- User friendly interfaces
- Lifetime services

**Being a security provider, Electrolux Palenzo completes its package by offering clients the latest technology in fingerprint locks.**

In return for joining our team of excellence, our customers are provided with a lifetime of support.

Our customers are among the most notable businesses in the market. By choosing Electrolux Macedonia, they are able to save time and money on the following:

- Service calls
- Replacement costs
- Loss of asset due to poor product quality
- System failure
- Unnecessary upgrading in short periods

**All of our cameras**

## Electronic safes

Our electronic safes are customized to suit venue decorations. Customers have the option to select the color, dimensions and even the type of electronic interface. We construct electronic safes to suit our customers' requirements.

We offer a wide range of electronic safe boxes for hospitality, retail and industrial applications.

Please download our catalogue from our website. You are always welcome to contact us via phone or e-mail (see below).

## Electronic door locks

Easy to install, high performance, beautiful door locks are offered in both touch-less and card-swiping formats. Locks come with hotel management software and are compatible with the most famous RFID cards in the industry. Our patented configuration of motorless mortise makes our locks significantly durable.

Please visit our website to see all the locks we provide.

## Surveillance system

Our surveillance system is a highly professional CCTV system with high resolution video files. It provides online access to video files, playback recording and searching from remote locations or monitoring multiple locations from across the globe.

Features of our surveillance systems:

- High resolution video images
- Remote access to multiple sites across the globe
- License plate recognition (LPR)
- Point of sales monitoring
- Remote playback
- Remote recording
- Remote searching
- Exterior and interior installations
- Night vision capability

•  
**have two years  
exchange warranty,  
and a life time of  
technical support, we  
have cameras built  
for any solutions and  
for any environment.**

**By bringing video and  
transaction data  
together, the  
POS/ATM-DVR  
surveillance system  
provides visual  
contextual awareness  
to reduce shrinkage  
and protect your  
assets, so managing  
multiple stores can  
become easy.**

**We provide security  
for our clients, in fact  
we design the security  
to suit their  
requirements**
