Stadium chair "Avangard"

Plastic chair is intended for the installation in both indoor and outdoor sports facilities (stadiums, ice rinks, sports complexes).

- Ergonomic, stylish design
- Easy to install and maintain
- Installation on the various surfaces
- Anti-vandal performance
- Fastening of the chair with 4 screws
- Numeration of seats
- System of outflow
- Chairs' color - any color upon customer's request
- Tested for strength, endurance, static load and wear resistance
- Operation temperature ranges from - 40 C to + 50 C
- UV-protected
- Made of materials slowing down the process of combustion
- Meets all FIFA and UEFA requirements
- Certificated

Stadium chair "Forward"

Extra-comfortable plastic chair "Forward" is intended for the installation in both indoor and outdoor sports facilities (stadiums, ice rinks, sports complexes).

- Ergonomic, stylish design
- Easy to install and maintain
- Installation on the various surfaces
- Anti-vandal performance
- Fastening of the chair with 4 screws
- Numeration of seats
- System of outflow
- Chairs' color - any color upon customer's request
- Tested for strength, endurance, static load and wear resistance
- Operation temperature ranges from - 40 C to + 50 C
- UV-protected
- Made of materials slowing down the process of combustion
- Meets all FIFA and UEFA requirements

Stadium chair “Titan”

Extra-comfortable plastic chair “Titan” is intended for the installation in both indoor and outdoor sports facilities (stadiums, ice rinks, sports complexes).

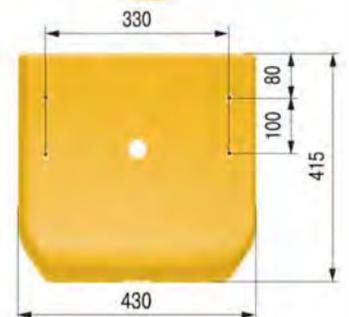

- Ergonomic, stylish design
- Double-layered backrest
- Easy to install and maintain
- Installation on the various surfaces
- Anti-vandal performance
- Fastening of the chair with 4 screws
- Numeration of seats
- System of outflow
- Chairs' color - any color upon customer's request
- Tested for strength, endurance, static load and wear resistance
- Operation temperature ranges from - 40 C to + 50 C
- UV-protected
- Made of materials slowing down the process of combustion
- Meets all FIFA and UEFA requirements

INSTALLATION SCHEMES

Stadium chair “Ultra”

- Ergonomic, stylish design
- Easy to install and maintain
- Installation on the various surfaces
- Anti-vandal performance
- Fastening of the chair with 4 screws
- Numeration of seats
- System of outflow
- Costs saving while transporting and storing
- Chairs' color - any color upon customer's request
- Tested for strength, endurance, static load and wear resistance
- Operation temperature ranges from - 40 C to + 50 C
- UV-protected
- Made of materials slowing down the process of combustion
- Certificated

Tip-up stadium chair "Sparta"

- Ergonomic, stylish design
- Anti-vandal performance, reinforced metal frame of the chair
- Polymer coating of the metal frame of the chair allows ensuring high corrosion-resistance
- Color of the chair's metal frame may be any upon customer's request
- The seat and backrest of the chair may be almost of any color upon customer's request
- Numeration of seats
- Easy to install and maintain
- Tested for strength, endurance, static load and wear resistance
- Operation temperature ranges from - 40 C to + 50 C
- UV-protected
- Made of materials slowing down the process of combustion
- Certificated

Tip-up stadium chair “Status”

- Ergonomic, stylish design
- Polymer coating of the metal frame of the chair allows ensuring high corrosion-resistance
- Color of the chair's metal frame may be any upon customer's request
- Numeration of seats
- Easy to install and maintain
- The seat and backrest of the chair may be almost of any color upon customer's request
- Tested for strength, endurance, static load and wear resistance
- Operation temperature ranges from -40 C to $+50\text{ C}$
- UV-protected
- Made of materials slowing down the process of combustion
- Certificated

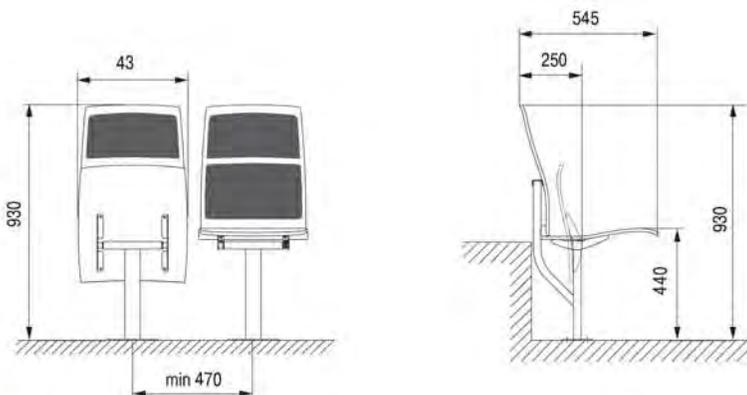

Tip-up stadium chair “Siluet”

- Ergonomic, stylish design
- Anti-vandal construction
- Metal frame covered with polymer, what guarantees high corrosive resistance
- Seat and backrest are made of plywood
- Color of metal frame: any upon customer's request
- Numeration of seats
- Easy to install and maintain
- Passed the test for durability, static pressure and wearing quality
- Operation temperature ranges from + 5 C to + 40 C
- Made of materials slowing down the burning process
- Certificated

Semi-upholstered tip-up stadium chair “Siluet-M”

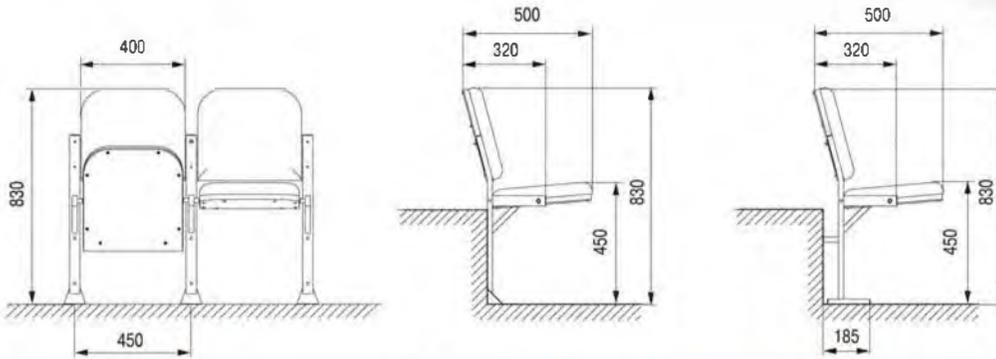

- Ergonomic, stylish design
- Anti-vandal construction
- Metal frame covered with polymer, what guarantees high corrosive resistance
- Seat and backrest are made of plywood
- Cover of soft elements: cloth, vinyl artificial leather
- Color of metal frame: any upon customer's request
- Numeration of seats
- Easy to install and maintain
- Passed the test for durability, static pressure and wearing quality
- Operation temperature ranges from + 5 C to + 40 C
- Made of materials slowing down the burning process
- Certificated

Semi-upholstered tip-up stadium chair "Elegant"

Intended for more comfortable spectators' areas and installation in indoor sports facilities (ice rinks, sports complexes).

- Ergonomic, stylish design
- Anti-vandal performance, reinforced metal frame of the chair
- Metal frame covered with polymer, what guarantees high corrosive resistance
- Color of metal frame: any upon customer's request
- Material of the seat and backrest of the chair is fabric or artificial leather
- The material may be of any color upon customer's request
- Numeration of seats
- There is an option to manufacture customized version of the chair upon request
- Certificated

Demountable Stands

The stand is intended for installation in both indoor and outdoor sports facilities

- The stands are manufactured in accordance with project designed by a licensed organization.
- The stands are produced from metal rectangular tubes with polymer coating, which ensures high corrosion resistance.
- Modularity of the construction allows reducing time of the installation maximally.
- Unlimited number of modules lengthwise.
- Possibility to manufacture the stand with a shed (PVC-fabric, polycarbonate, profiled metal roofing).

- Aisles and stair flights boarding are made of metal checkered sheets (plywood with anti-slip coating is optional).
- Stand may be lifted up over the base up to 1 500mm (for more convenient watching over the boards of ice rink, advertising panels etc.).
- The entry to the stand may be made from any side regarding to specification of a project.
- Possibility to manufacture fully customized stands.
- Supervised or ready-to-operate installations are possible.
- Certificated

Auto-roue complex

Mobile bleachers

This is the best option for spectators' seats regarding price and comfort with capacity of 50 seats and 1 stair flight. Mobile bleachers are equipped with rubber or PA wheels for easy transportation.

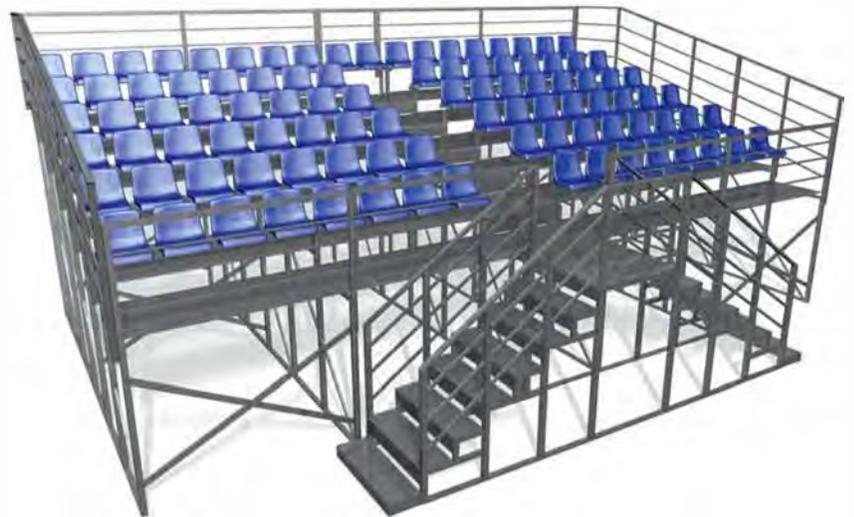

Made of metal rectangular tubes with polymer coating, which ensures high corrosion resistance.

Stands with uplift

The stand is intended for installation in both indoor and outdoor sports facilities

- Possibility to manufacture the stand with a shed (PVC-fabric, polycarbonate, profiled metal roofing)
- Aisles and stair flights boarding are made of metal checkered sheets (plywood with anti-slip coating is optional).
- Stand may be lifted up over the base up to 1 500mm (for more convenient watching over the boards of ice rink, advertising panels etc.).
- Supervised or ready-to-operate installations are possible.
- Certificated

Fast-Track Stands

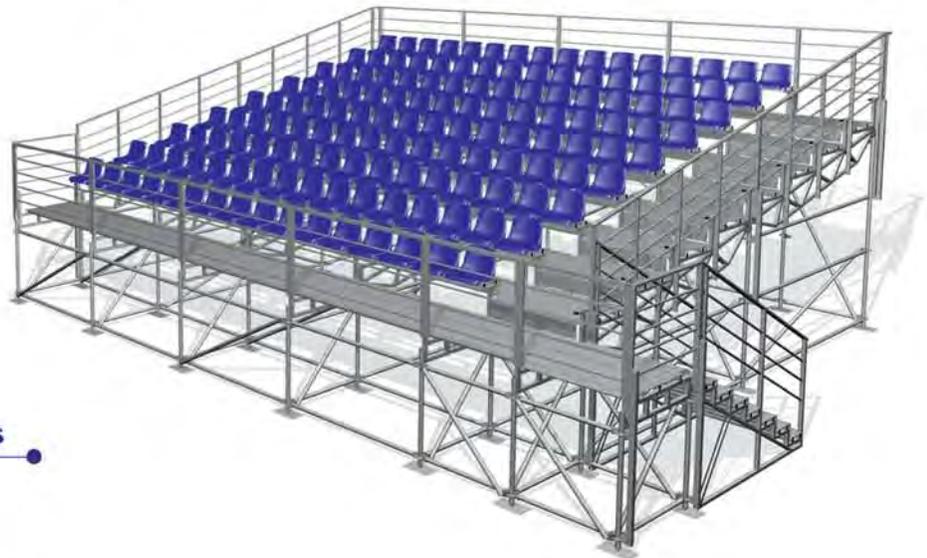

Fast-track stands have the same specifications as demountable stands and also a set of advantages:

- The stands are manufactured in accordance with project designed by a licensed organization.
- Easy to install using original mount system of stand elements
- The stands are produced from metal rectangular tubes with polymer coating, which ensures high corrosion resistance
- Possibility to manufacture stands with the number of rows up to 30, while the sizes of components will be constant, which will ease the transportation.
- Possibility to manufacture corner (round) shaped stands.
- Structural stiffness with minimal metal consumption.
- Possibility of quick stand demounting and moving it to another site.
- Possibility of stand installation on uneven surfaces because of adjustable supports.
- Possibility to change stand configuration on-the-fly
- Stand may be lifted up over the base up to 2 300mm (for more convenient watching over the boards of ice rink, advertising panels etc.)
- Number of rows: from 5 up to 30

Demountable stands with roofs or canopies

The stand with a roof is designed for outdoor sport facilities and to be used as unfavorable weather conditions protection.

- Roofing materials – PVC-fabric, polycarbonate, profiled metal roofing
- Both stands and roofs are made of metal rectangular tubes with polymer coating, which ensures high corrosion resistance.
- Supervised or ready-to-operate installations are possible.
- Made by a project with structural analysis

Telescopic bleachers

Telescopic bleacher is intended for application in indoor sports facilities in order to use the space of a room more efficiently. While carrying out the sports competitions telescopic bleachers are pulled forward, letting you to create comfortable conditions for the spectators and if there is no need in them, the bleachers are drawn back, releasing the area for the training or for sports grounds of larger sizes.

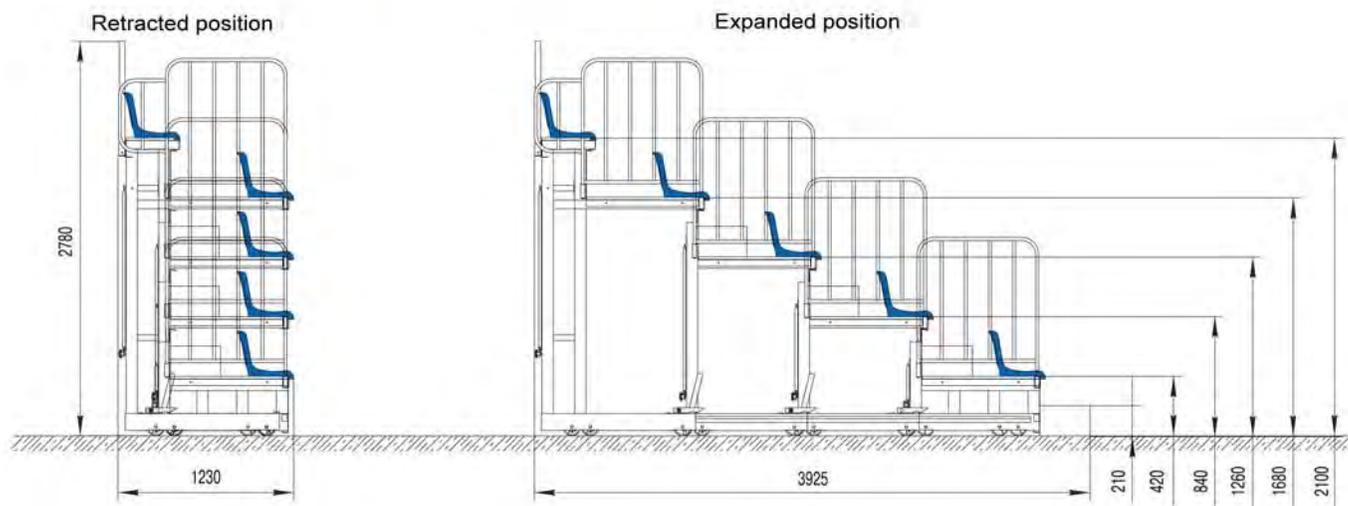

Additional advantages of the telescopic bleachers:

- Made of metal rectangular tube with polymer coating, which ensures high corrosion resistance.
- Any color of metal construction is available upon customer's request.
- Modularity of the construction allows reducing the time of the installation maximally.
- Unlimited number of modules lengthwise.
- Aisles and stair flights boarding are made of plywood with anti-slip coating (application of carpet and linoleum is an optional).
- Side and rear guards ensures the security of the spectators while getting on and out the bleacher.
- Possibility to manufacture fully customized bleachers.
- Supervised or ready-to-operate installations are possible.
- Certificated.

Optionally - we can equip telescopic bleacher with a remote controlled motor drive

Benches for substitutes

Intended for accommodation of coaches, substitutes, judging panel and to be installed in open sports grounds, stadiums

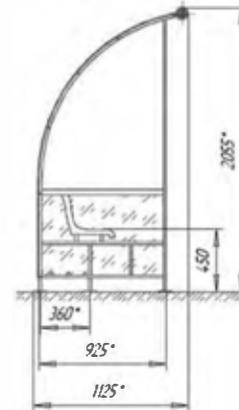

- Made of metal rectangular tubes with polymer coating, which ensures high corrosion resistance.
- The bench for substitutes is equipped with individual plastic chairs.
- The bench cover is intended for protection from unfavorable weather conditions and can be made of PVC-fabric or polycarbonate.
- Simplicity and modularity of the construction allows manufacturing bench for substitutes for any number of seats.
- Any color of metal construction, chairs, shed is available upon customer's request.
- Possibility of your logo application on the shed.
- Supervised or ready-to-operate installations are possible.
- Certificated

Players' tunnel

The players' tunnel is designed for sportsmen protection during coming to a field.

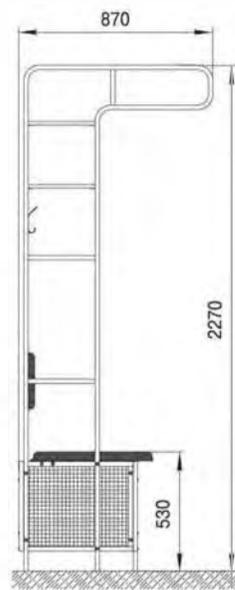

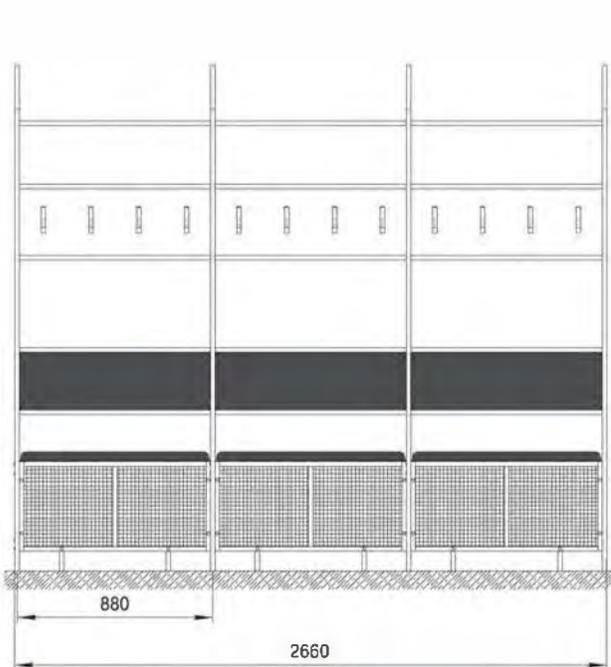

- Frame is telescopic and made of metal rectangular tubes with polymer coating, which ensures high corrosion resistance.
- Cover is made of PVC-fabric.
- Possibility to make almost any number of sections lengthwise

Sportsmen dressing rooms

Intended for efficient arranging the space for dressing of sportsmen, referees, coaches and maintenance staff.
Designed for indoor spaces installation

- Made of metal square tubes with polymer coating, which ensures high corrosion resistance.
- Soft parts of seat and backrests are made of durable wear-resistant artificial leather.
- Metal construction and soft parts are of any color upon customer's request.
- The outfit box has ventilated construction.
- Shelves and hooks for clothes allow locating personal belongings of the players efficiently.
- Simplicity of the construction, availability of corner modules allows to use the space of the room efficiently.
- Supervised or ready-to-operate installations are possible.
