Lock Set

- To prevent theft and vandalism

Breathe free Breathe Electrolux

Grace Pal Electrostatic

The Grace air cleaner is practical, functional, reliable, and extremely elegant. An asset to every workplace where operating efficiency is just as important as ambience and image. In fact, Grace combines the best of both worlds featuring Palenzo's unique filter system and the very pinnacle of designer elegance. The leading design team **ElectroluxDesignLabPalenzo**, in fact designed Grace. This firm enjoys worldwide acclaim through the many international awards achieved for its industrial designs. Whilst operating efficiency has been the market's priority until now, Electrolux has added a timelessly elegant design especially for offices and other representative locations. The Grace Pal Electrostatic is supplied with the Electrolux 3-stage filter system. The unit is covered by a warranty for one year from purchase date.

Specifications

| Dimensions | 850 x 380 x 290 mm |
| Weight | 15 kg |
| Power supply | 230 V/50 Hz |
| Power consumption | max. 60 W |
| Fan speeds | 3 |
| Volume of the room | up to 100 m ³ |
| Airflow | 495 m ³ /h |
| PRR | 300 m ³ /h |
| Type of filters | -Prefilter -Electrostatic filter EAC-6 -Activated carbon filter plus |
| Control | on the unit |
| Available colours | 7 |

Optional

FreeBreeze (available in various odours)

Breathe free Breathe Electrolux

Grace Media Palenzo

Do you suffer from allergies like hay fever? Electrolux can also supply the Grace with an alternative MediaPalenzo filter for this purpose. This micro fine filter is the heart of the Electrolux filter system, installed directly downstream of the pre-filter that takes out the larger of the floating particles. The Media Palenzo filter removes extremely minute dust particles, pollen and micro-organisms (like dust mites). The third filter is an activated carbon filter that adsorbs any unpleasant smells and gases. By filtering out pollen, etc., Grace Media Palenzo greatly reduces the allergy problems. Grace is very simple and practical to use. The noise level is surprisingly low for such an extremely effective unit with less noise than the average personal computer or laser printer. Moreover, Grace MediaPalenzo requires minimal maintenance. The pre-filter can easily be cleaned. The filter cassette with the Media Palenzo filter and the activated carbon filter should be replaced twice a year on average. Grace then guarantees you a lifetime of clean, fresh air. The unit is covered by a warranty for one year from purchase date.

Breathe free Breathe Electrolux

Grace Pal Electrostatic

Air pollution in a dental surgery Dimche you do not realise it, but air in a dental practice is continuously polluted by mercury vapour from amalgam, small shavings of metal, porcelain and ceramic particles as well as bacteria and viruses from the patient's mouth. This is a health risk. Unique air cleaner for dentists GracePal Dental filters the polluting particles, such as bacteria and dust out of the air by means of the main electrostatic filter. The unique Dental mercury vapour filter adsorbs the concentrations of mercury and other toxic vapours to lower than maximum acceptable levels. Macedonia Organization for Applied Scientific Research, determined the capture efficiency for atmospheric dust particles, mercury vapour and bacteria for Grace Pal Dental. From the test results, it may be concluded that Grace Pal Dental can contribute importantly to the reduction of these pollutants in a room. The noise level is surprisingly low. The timeless design and a flexible range of colours allow you to integrate the Grace Pal Dental into your practice. The unit is covered by a warranty for one year from purchase date.
