

## Heaters for small surfaces

Contours, curved surfaces, edges or corners are a real challenge for heating processes.

Infrared heaters for small surfaces, our Duo or Quattro Infrared heaters, are the optimum solution for complex geometries. They are successfully used for trims, carpets or dashboards in vehicles.

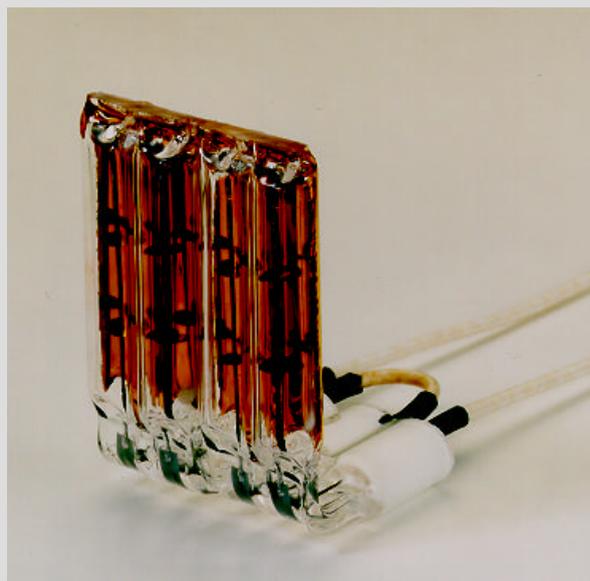

Infrared emitters with response times within seconds ensure heating processes at high efficiency and safety. The selection of the optimum emitters helps to heat only where it is needed.

- Saving of energy
- Saving of space
- In-line heating processes

Technical Data of Duo und Quattro

	Duo	Quattro
Power	250 W	500 W
Heated Space	22x45 mm	45x45 mm
Spectrum	short wave	short wave
Response time	1-2 seconds	1-2 seconds
Gold reflector	yes	yes
Easy handling and maintenance	yes	yes

Data sheet– January 2006 – We reserve the right to change data
